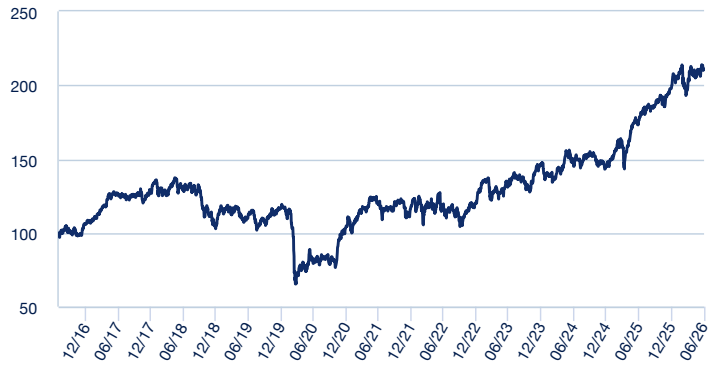
SABADELL ESPAÑA BOLSA FUTURO, F.I. - PYME

INVESTMENT POLICY

The Fund invests mainly in shares listed on Spanish stock exchanges, including assets of Spanish issuers listed on other markets. Invests in small and mid-cap equity securities that exhibit a potentially higher long-term rate of future earnings growth, also incorporating investments in other large-cap securities with good prospects for future earnings growth. The selection of securities is made by taking into account not only economic and financial aspects but also extra-financial criteria of sustainable investment, environmental, social and good governance, also known as ESG, applying the ESG methodology developed by Amundi.
Further description of the investment policy can be found in the key investor information document (KIID), which is available at sabadellassetmanagement.com.
WARNING: This Fund can invest up to 25% in fixed income securities rated below investment grade, which represents a high credit risk.

UNIT CLASS PERFORMANCE (NET ASSET VALUE)



The Fund is actively managed against a benchmark and seeks to outperform the 50% IBEX 35 Net Return, 25% IBEX Medium Caps Net Return and 25% IBEX Small Caps Net Return Index. The Fund is primarily exposed to benchmark issuers. However, management of the Fund is discretionary and will be in issuers not included in the benchmark. The Fund monitors risk exposure relative to the benchmark, even if the deviation from the benchmark is significant.

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
