

**SABADELL FUNDS SICAV**  
**CAPITAL APPRECIATION 3**

**INVESTMENT POLICY**

The Fund invests primarily (a minimum of 1/4 of its net assets) in a highly diversified bond portfolio in order to take advantage of more attractive yields than those available in the euro monetary market without increasing excessively the incurred risk. The Fund uses debt based financial instruments either directly or through other UCITS funds. The rest of the portfolio may be invested in other UCITS funds and stocks or other equity securities issued by companies mainly based in Europe or that conduct most of their business in the continent and that have been listed in European stock markets. The sub-fund is actively managed without reference to a benchmark. Further description of the investment policy can be found in the KIID, which is available at [www.sabadellassetmanagement.com](http://www.sabadellassetmanagement.com).

**UNIT CLASS PERFORMANCE (NET ASSET VALUE)**

Past performance is not a reliable indicator of future performance.

The Fund is actively managed and not against a benchmark index.

Major changes in the investment policy took place on 5/5/2014 4/27/2015 and 6/7/2018.

The risk indicator represents the risk and return profile as presented in the KIID. The lower risk level does not imply no risk. The risk indicator is not guaranteed and may change over time. Detailed information on the Fund's risks can be found in its prospectus.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Emerging Markets risk: Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

All investments involve risks. Any of these risks could cause the fund to lose money, to perform less well than similar investments, to experience high volatility (ups and downs in NAV), or to fail to meet its objective over any period of time. Please refer to the "Risks Descriptions" in the Prospectus for further information on the Fund's risks.
